Peer Review Disclaimers

Many NIH scientific information products are not covered by the Bulletin e.g., non-“influential” information and products that are in draft form or that do not represent the official views of the NIH. However, the Bulletin requires the use of clear disclaimers with certain information products, including:

- Draft influential scientific information released for the purposes of pre-dissemination peer review. This information must include the following disclaimer:

“This information is distributed solely for the purpose of pre-dissemination peer review under applicable information quality guidelines. It has not been formally disseminated by NIH. It does not represent and should not be construed to represent any NIH determination or policy.”

- Draft influential scientific information shared for scientific input prior to peer review with scientists who are not Federal employees or NIH awardees. This information must include the following disclaimer:

“The findings and conclusions in this report (presentation) have not been formally disseminated by NIH and should not be construed to represent any NIH determination or policy.”

- Influential scientific information that does not represent the views of the NIH that is disseminated by scientists employed by the NIH, unless it is otherwise clear that the information does not represent the official views of the NIH. This information must include the following disclaimer:

“This presentation (paper) was written by authors in their capacity as NIH employees, but the views expressed in the presentation (paper) do not necessarily represent those of the NIH.”
